# How to add Books to your Readables

<https://www.youtube.com/embed/rK3uSRpfIRE?si=H9e5HuUNkM-6p2hz>

1. Navigate to your dashboard
2. Select the 'Add a Book' icon on the 'Books Read' widget.
3. Type in the ISBN13 number associated with your book.
  1. You can find your ISBN13 code either on the back of your book or on the first few pages with additional printing and copyright information. It is also possible to find the ISBN13 by searching the book on Amazon and looking at the 'Product Details'
  2. Currently Booktower only supports ISBN13 codes for books. If your book's ISBN is only 10 characters long, then it is an ISBN10 and you'll need to use a converter. We hope to support ISBN10s in the future!
4. Select the Status and Date that will be applied to all books entered.
5. Select 'Add it!' to add the book to your Readables list.

**Alternatively, if you wish to add several books at once, select the 'Bulk Mode' icon in the top right.**

1. In the bulk mode, enter the ISBN13s of the books you wish to add on separate lines of the text field.
2. Select the Status and Date that will be applied to all books entered.
3. Select 'Add them!' to add them to your Readables list.

**Once the books have been added to our system, they will appear in your Readables list! Occasionally, some books require more information and will take longer to appear in your Readables list.**

# How to add Lots of Physical Books to your Readables via Barcodes

If you have lots of physical books and your books have barcodes you can use a barcode scanner to add them!

While many different barcode scanners may work, the Booktower team has tested with the [Tera Barcode Scanner](#) which works on both Windows & Linux and is available for \$30 USD at the time of writing this.

Once you have your scanner, you can connect the provided wireless adapter to your computer (for the Terra Scanner the wireless adapter is in the bottom of the handle) and use it to more easily add books via the Bulk Mode.

Just open the bulk mode, make sure to click inside the text field, and scan away! We recommend checking your screen and submitting the list every so often, just in case something goes wrong and your submission doesn't go through.

If you've used another easily purchasable scanner with Booktower and it worked, let us know! We hope to create a list of working scanners on this page.

*We don't provide official support for it but you can ask other readers for help in the Booktower Discord if you get stuck.*

## Required Tools

2. Make sure you're logged into AO3 and have access to your work history and/or bookmarks.
3. Go to your history/bookmarks and click on the bookmark that you added in step 1.
  - This will download a spreadsheet of that page's fics.
  - You have to do this for each page of your Bookmarks/History.
4. Open each spreadsheet in your spreadsheet software.
5. Copy the column that has the links in it.
6. Paste the links into Booktower's [Bulk Digital Readable form](#).
